

EMERGE DSB

EMERGE DSB is a dashboard and report management application that consumes data in real time and configures it into charts, graphs, news feeds or alerts that empower decision-making and enable risk management.

Enterprise dashboards enable organizations to track dynamic variables, such as economic shifts, market trends, industry issues and key risk indicators (KRIs) in real-time. Real-time input enables the enterprise to react to risks, take advantage of opportunities, make smart decisions and respond to critical events as they happen.

EMERGE DSB is an intelligent enterprise dashboard and report management application that is flexible, easy-to-use, multi-functional and fully scalable. The system assembles data from multiple sources into a visual display and automatically generates summary reports. It also supports identification of relevant data for purposes of tracking KRIs or marketing opportunities. Users can create dashboards or reports with various types of content, including simple charts or graphs, syndicated news streamed from outside sources, or customized dashboards or reports.

EMERGE DSB has these advanced features:

- It can be configured to display graphic information, reports, newsfeeds or data alerts in real-time;
- The system can also produce alerts or reports based on specific data points, thresholds or types of information;
- Input from multiple sources can be combined and configured automatically and instantaneously; and
- Data can be viewed on a dashboard or in a report scheduled for delivery on a daily, weekly or monthly basis.

The use of high-powered dashboards enables smart, rapid decision-making and enhances an organization's ability to achieve performance objectives and manage risk. EMERGE DSB gives organizations the ability to implement and maintain successful dashboard reporting strategies efficiently and cost-effectively for enhanced performance, informed decision making and effective risk management.
